Listing of the Claims:

This listing of the claims will replace all prior versions and listings of claims in the application.

1. (Currently Amended) A composition for enhancing the rate of mammalian skin exfoliation comprising

a. from 0.05% to about 30% of a water-soluble Vitamin E derivative selected from the group consisting of Lauryl Imino Dipropionic Acid Tocopheryl Phosphate[[s,]] and Disodium Lauriminodipropionate Tocopheryl Phosphate; and

b. water, where the water-soluble Vitamin E derivative is substantially in the water; and,

c. a topically acceptable carrier for application to the skin and for assisting in maintaining a pH of the composition from about 4.5 to about 9, wherein the carrier includes tetrasodium EDTA and at least one neutralizer.

2. (Canceled)

3. (Original) The composition of claim 1, where the composition does not comprise squalene or squalane.

4. (Canceled)

5. (Previously Presented) The composition of claim 1, where the water-soluble Vitamin E derivative is Disodium Lauriminodipropionate Tocopheryl Phosphate.

6. (Original) The composition of claim 1, where the composition comprises from 0.1% to about 20% of the water-soluble Vitamin E derivative.

7. (Original) The composition of claim 1, where the composition comprises from 0.1% to about 10% of the water-soluble Vitamin E derivative.

8. (Original) The composition of claim 1, where the carrier further comprises a cosmetic ingredient.

9. (Original) The composition of claim 1, where the composition has a pH from 4.8 to 8.2.

10. (Original) The composition of claim 1, where the composition has a pH from 5.6 to 7.9.

11. – 36. (Canceled)
